Mobile App live view

What is Remote Access?

Remote Access is the service connecting your Axis cameras with our CamStreamer Cloud. You can remotely access your cameras (no public IP or VPN needed), activate watchdog alerts, and manage cameras via a mobile app.

How does Remote Access work?

After a short registration process in the CamStreamer Cloud, you simply add a camera to your account using the installation wizard. While your cameras are connected you can view and manage all cameras via our CamStreamer Cloud platform in your browser.
What can you do with Remote Access?
Use CamStreamer Cloud platform and mobile app

All your connected cameras are available on the platform whenever and wherever you want.

Keep an eye on your cameras

CamStreamer Cloud monitors your cameras, apps, and livestreams via watchdog alerts.

Manage your users

Create more user accounts with defined authorization capacities.

Features

Remote access to your cameras

No public IP or VPN needed

Mobile app for live view

Dashboards

Cloud Service
RECORDING

Record and store Full HD video
in the CamStreamer Cloud.

CAMSTREAMER
Cloud Services

HD
Full HD resolution

30 days storage

Access via mobile app

What is Recording?

Recording is a CamStreamer Cloud exclusive feature for recording live stream footage for storage in the CamStreamer Cloud, on an SD card, or both together.

How does Recording work?

The footage is recorded at Full HD (1080p/30fps) and the recordings are available in the cloud for 30 days. Storing on an SD card is without limit and can be even in 4K.

What can you do with Recording?
Browse all recordings for up to 30 days

All your recordings are available on the platform whenever you need them.

Review faster with thumbnail images

When you move your mouse on the timeline you can see the preview in thumbnails without any click.

Access recordings via the mobile app

Recordings are available via a web browser or mobile app for your mobile device (Android / iOS).

Features

Your cloud storage

Local copy on the SD card

Easy video export

Instant thumbnail preview

Fast-playback

Mobile app in your pocket

Cloud Service
TIMELAPSE

Create time-lapse videos using camera's maximum resolution

CAMSTREAMER
Cloud Services

SD backup

**Choose what to export**

Select frame rate

What is TimeLapse?

TimeLapse is a CamStreamer Cloud exclusive feature for creating time-lapse videos at the maximum resolution of the camera.

How does TimeLapse work?

TimeLapse periodically takes pictures at a set time and uploads the footage into the cloud with a local backup on the SD card. You can export videos with just a few clicks.

What can you do with TimeLapse?

Create great marketing videos

Time-lapse videos are a great marketing tool for promoting construction projects and documenting building, landscaping, and refurbishing.
Export with just a few clicks

You can choose what parts of the video to export and transform into a time-lapse by selecting a specific time period, e.g. footage from 7 AM to 5 PM.

UP TO 4K

Utilize the maximum resolution of your camera

Exported time-lapse videos can be up to 4K or the maximum resolution of your Axis camera.

Features

Custom time-lapse image frequency

Local copy on the SD card

Auto-sync from SD card

1-click export video

Maximum resolution (up to 4K)

Fully compatible with our other cloud services

Check our LIVE GALLERY
and see Axis cameras in action
Our apps power **more than 20,000 cameras worldwide** and many of these live cameras can be seen at **camstreamer.com/live**. In the live gallery, you can search among hundreds of beautiful well sorted streams using full-text search or filter them by category or Axis camera type.
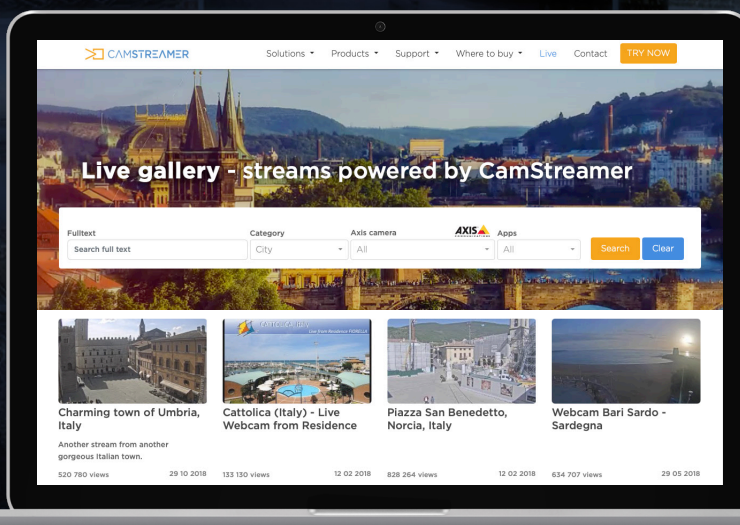

About CAMSTREAMER

CamStreamer is a Czech company based in Prague.
As a developer of ACAP apps and cloud solutions exclusively for Axis cameras, the company is an Axis partner for over a decade.

CamStreamer in-camera apps can livestream with no computer/edge HW or complicated setup needed. Livestreams can be completed with dynamic overlay graphics, mixed with prerecorded videos, and sorted into playlists. External data can be embedded and visualized. The CamStreamer Cloud solution provides easy remote access to cameras without fixed IP or VPN, the ability to create dashboards, or utilize Recording and TimeLapse features.

Do not hesitate to contact us, in case of any questions!
