

## Release Notes – Milestone XProtect™ Professional 7.0

It is with great pleasure that Milestone Systems as of June 22, 2010, releases

### Milestone XProtect Professional 7.0

XProtect Professional is designed for small to mid-sized installations that need robust single-server surveillance software with the full functionality of advanced management, flexible scheduling, fast searching and video analysis. XProtect Professional supports up to 64 cameras simultaneously with the widest choice of network video and hardware equipment.

*New management application with the system configuration wizards that significantly simplifies installation and management of XProtect Professional.*

## What's New in XProtect Professional Version 7.0?

XProtect Professional release 7.0, including the significantly enhanced Smart Client 5.0, offers an array of new functions that enable fast deployment and easy management of small to medium sized surveillance installations.

### XProtect Professional Server 7.0a

- **New Management Application**

A new Management Application provides consolidated single point management access to the XProtect Professional Recording Server. It combines the former management applications Administrator & Image Server Administrator. This significantly enhances usability and manageability.

- **System configuration wizards**

New system configuration wizards guide the user through the process of adding cameras, configuring video, scheduling recordings, adjusting motion detection settings, configuring users. All which makes the system easy to install and deploy.

- **Automated device discovery**

Enables fast discovery of camera devices using methods such as Universal Plug and Play, Broadcast and IP Range scanning. Automated device and IP-address handling reduces both time and cost of the installation.

Any resemblance to any actual organization or person, living or dead, is purely coincidental and unintended.

- **Smart bulk configuration option**  
Simultaneous change of settings across multiple devices with a few clicks.
- **Adaptable application behavior**  
Guides novice users, while expert users can optimize the application for efficient use. This ensures optimal user experience for different skill-levels.
- **Export/import of system and user configuration data**  
System backup for reliable system operation and fast system recovery. System cloning for efficient rollout of multiple systems with the same, or similar, configuration.
- **Import of off-line configuration data**  
Enabling off-line editing of configuration data, including camera and device definitions. This reduces the need for onsite configuration of customer systems.
- **Automatic system restore points**  
A restore point is created each time a configuration change is confirmed. All the restore points in the current and previous five sessions are stored and can be reapplied. This enables easy rollback to previously defined system configuration points and enables cancelation of undesired configuration changes and restoration of earlier valid configurations.
- **Enhanced audit log**  
Full logging of all user actions, including camera controls and what cameras the user is watching.

#### XProtect Smart Client 5.0b

- **Sequence Explorer**  
The innovative Sequence Explorer provides intuitive navigation of recorded video and time sequences from one or multiple cameras, enabling accurate and fast investigation of incidents and evidence extraction. The Sequence Explorer is smooth to navigate with a sliding preview and "drag-and-throw" function for video thumbnails.
- **Overlay Buttons**  
Overlay buttons enable intuitive control of cameras, camera-integrated devices and other integrated systems directly from the camera view. Appearing as overlay buttons when mousing over a particular camera, the buttons provide an intuitive and logical working environment that improves response time
- **Independent Playback**  
The new instant and independent playback function allows you to independently playback recorded video for one or more cameras, while in live viewing or playback mode. When used in live mode, this will increase the operator's ability to investigate incidents while still monitoring live video.
- **Application options**  
To fit the specific needs of operators, or specific surveillance requirements, the new Smart Client 5.0 allows users to adapt the layout and personalize the application to their particular preferences. The work not only becomes easier, but the cost of training new operators can also be reduced.
- **Updated Smart Client graphics**  
New icon-based control of panes in the side bar, combined with new scroll function make navigation far easier. Slimmer application title bar design leaves more space for the video.
- **Full screen mode**  
Full screen mode displays camera views only, and hides all unnecessary information.
- **Localization**  
XProtect Smart Client is now available in 20 different languages.

### Included modules

- Download Manager 1.0c
- Smart Client 5.0b
- Remote Client 3.6c
- Viewer 1.3d
- PDA Client 1.0e
- PDA Server 1.0e
- Matrix Monitor 2.3a

### Supported Languages
