IXE20 Series Sarix™ EP Network Camera

2.1 MEGAPIXEL EXTENDED PLATFORM HIGH DEFINITION DIGITAL CAMERAS

Product Features

- Open IP Standards
- Up to 2.1 Megapixel Resolution (1920 x 1080)
- Up to 30 Images per Second (ips) at 1920 x 1080
- Auto Back Focus
- H.264 and MJPEG Compression Capability
- Color and Day/Night Models
- Video Setup Jack
- Sensitivity Down to 0.03 Lux
- Power over Ethernet (IEEE 802.3af) or 24 VAC
- Up to 2 Simultaneous Video Streams
- Built-in Analytics
- Local Storage (Mini SD) for Alarm Capture
- Motion Detection
- Audio Accessory Available

The IXE20 Series extended platform (EP) camera with Sarix™ technology is a 2.1 megapixel (MPx) network camera designed with industry-leading image quality and high performance processing power. Designed to install quickly, the camera includes automatic back focus control, built-in analytics, and other advanced features needed for demanding security applications.

Sarix technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are up to 20 times smaller making high definition video more affordable.

Camera

The IXE20 Series has two 2.1 megapixel models: color and day/night. Both models feature advanced low-light technology capabilities. The day/night model has a mechanical IR cut filter for increased sensitivity in low-light installations.

The IXE20 Series can support two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The extended platform gives real time video (30 ips) with HD resolution using H.264 compression for optimized bandwidth and storage efficiency. The streams can be configured to a variety of frame rates, bit rates, and GOP (group of pictures) structures for additional bandwidth administration.

Built-in Analytics

Pelco® Analytic Suites and ObjectVideo® (OV) Analytic Suites enhance the flexibility and performance of the IXE20 Series camera. Pelco’s Camera Sabotage behavior is a standard feature of six models, including the IXE20C, IXE20DN, and all models that are preloaded with Pelco Analytic Suites. IXE20 Series models are also available preloaded with OV Analytic Suites.

Pelco Analytic Suites are easy to configure for alarm notification when used with Endura® or a third-party system that supports Pelco’s Analytics application programming interface (API). OV Analytic Suites offers rule configurations and alarm notifications that are easy to enable when using OV Ready™ systems.

Web Interface

The IXE20 Series uses a standard Web browser for powerful remote setup and administration. Up to 16 cameras can be viewed on the same network.

Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The IXE20 Series supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

Video Systemization

The IXE20 Series easily connects to Pelco IP and hybrid systems such as Endura version 2.0 (or later) and Digital Sentry® version 4.2 (or later). The camera also features open architecture connectivity to third-party software. Pelco offers an API for interfacing with Pelco’s network cameras.
Pelco Analytic Suites are offered in two distinct packages: the Standard Suite and the Enhanced Suite.

The Standard Suite allows you to run the Camera Sabotage behavior plus one other behavior. The Enhanced Suite is capable of running up to three behaviors at the same time. The number of behaviors is limited to the available processing power of the camera.

Note: Available processing power is determined by the settings for compression standards, resolution, image rate, bit rate, and analytic configuration. For each behavior, you can create several custom profiles that contain different camera settings. With these profiles, you can set up different scenarios for the behavior, which will automatically detect and trigger alarms when specific activity is detected.

Pelco Analytic Suites are configured with an Endura or API system, which enables the behaviors to automatically detect and trigger alarms when specific activity is detected. Multiple Pelco analytics can be scheduled to work during a certain time or condition. For example, during the day, a camera can be programmed with Object Counting to count the number of people that enter a lobby door. At night, the operator can change the profile to Camera Sabotage to trigger an alarm if a camera is moved or obstructed. Each suite includes the following behaviors:

- **Abandoned Object**: Detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows. An airport terminal is a typical installation for this behavior. This behavior can also detect objects left behind at an ATM, signaling possible card skimming.

- **Adaptive Motion**: Detects and tracks objects that enter a scene and then triggers an alarm when the objects enter a user-defined zone. This behavior is primarily used in outdoor environments with light traffic to reduce the number of false alarms caused by environmental changes.

- **Camera Sabotage**: Detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed by spray paint, a cloth, or a lens cap. Any unauthorized repositioning of the camera also triggers an alarm.

- **Directional Motion**: Generates an alarm in a high traffic area when a person or object moves in a specified direction. Typical installations for this behavior include an airport gate or tunnel where cameras can detect objects moving in the opposite direction of the normal flow of traffic or an individual entering through an exit door.

- **Loitering Detection**: Identifies when people or vehicles remain in a defined zone longer than the user-defined time allows. This behavior is effective in real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.

- **Object Counting**: Counts the number of objects that enter a defined zone or cross a tripwire. This behavior might be used to count the number of people at a store entrance/exit or inside a store where the traffic is light. This behavior is based on tracking and does not count people in a crowded setting.

- **Object Removal**: Triggers an alarm if an object is removed from a defined zone. This behavior is ideal for customers who want to detect the removal of high value objects, such as a painting from a wall or a statue from a pedestal.

- **Stopped Vehicle**: Detects vehicles stopped near a sensitive area longer than the user-defined time allows. This behavior is ideal for airport curbside drop-offs, parking enforcement, suspicious parking, traffic lane breakdowns, and vehicles waiting at gates.

ObjectVideo Analytics Suites are preloaded on selected IXE20 Series cameras and require an OV Ready system to configure the behaviors for alarm notification.

**OV Security Suite**

The OV Security Suite is easy to use and includes Tripwire Detection, Inside Area Detection, and Camera Tamper Detection behaviors.

- **Tripwire Detection** identifies objects that cross a user-defined line drawn within the camera’s field of view.
- **Inside Area Detection** identifies objects entering, appearing, or moving within a user-defined area.
- **Camera Tamper Detection** identifies significant contrast changes in the camera’s field of view; for example, if the lens is obstructed by spray paint, a cloth, or a lens cap.

**OV Security Suite Plus**

- **Multi-Line Tripwire Detection** identifies objects that cross two defined lines and generates an event based on defined parameters, including directionality. Defined parameters for this behavior include direction, sequential order, and time between crossing each tripwire.
- **Loitering Detection** identifies when people or vehicles remain within a defined area beyond a specified period of time. This behavior is effective for real-time notification of suspicious behavior around ATMs, stairwells, and school grounds.
- **Leave Behind Detection** detects objects placed in a defined zone and triggers an alarm if the object remains in the zone longer than the user-defined time allows.

**OV Event Counting Suite**

The OV Event Counting Suite uses advanced object calibration and additional features for schedules, parameters, and multiple rules. The suite includes behaviors for Tripwire Counting, Enters/Exits Counting, Loiter Counting, Occupancy Sensing, and Dwell-Time Monitoring.

- **Tripwire Counting** counts people or objects that cross a user-defined line.
- **Enters/Exits Counting** calculates the number of people that enter and exit an area without using a tripwire.
- **Loiter Counting** is useful in analyzing how frequently people stop in front of a product, display, or other area of interest. This feature is also useful in assessing promotion effectiveness and product interest.
- **Occupancy Sensing** counts people and generates a new value every time the occupancy level changes. Since each occupancy output is time-stamped, the data can be used to determine average occupancy levels or to correlate data to point-of-sale or other business scenarios.
- **Dwell-Time Monitoring** rules can be set up to record the length of time between when an object enters and then exits an area. Along with queue size information, wait times can also be assessed. This behavior can be used to evaluate consumer interaction for a point-of-sale display or digital advertisement.
The following diagram illustrates how the camera system interprets streaming video when embedded analytics are configured and enabled.

**IMPORTANT NOTE: PLEASE READ.** The network implementation is shown as a general representation only and is not intended to show a detailed network topology. Your actual network will differ, requiring changes or perhaps additional network equipment to accommodate the system as illustrated. Please contact your local Pelco Representative to discuss your specific requirements.
TECHNICAL SPECIFICATIONS

GENERAL
- Imaging Device: 1/3-inch (effective)
- Imager Type: CMOS
- Imager Readout: Progressive scan
- Maximum Resolution: 1920 x 1080
- Signal-to-Noise Ratio: 50 dB
- Auto Iris Lens Type: DC drive
- Electronic Shutter Range: 1~1/100,000 sec
- Wide Dynamic Range: 60 dB
- White Balance Range: 2,000° to 10,000°K
- Sensitivity:
  - Color (33 ms): f/1.2; 2,850°K; SNR >24 dB
  - Color SENS (500 ms): 0.12 lux
  - Mono (33 ms): 0.25 lux
  - Mono SENS (500 ms): 0.03 lux
- Weight (without lens): 1.14 lb (0.51 kg)
- Shipping Weight: 2.00 lb (0.90 kg)

ELECTRICAL
- Port: RJ-45 connector for 100Base-TX
- Cabling Type: Cat5 or better for 100Base-TX
- Power Input: 24 VAC ±10% or PoE (IEEE 802.3af class 3)
- Power Consumption: <7 W
- Current Consumption:
  - PoE: <200 mA maximum
  - 24 VAC: <295 mA nominal; <390 mA maximum
- Local Storage: Mini SD
- Alarm Input: 10 VDC maximum, 5 mA maximum
- Alarm Output: 0 to 15 VDC maximum, 75 mA maximum
- Service Port: External 3-connector, 2.5 mm provides NTSC/PAL video output

MECHANICAL
- Lens Mount: CS mount, adjustable
- Camera Mount: 0.25-inch (0.64 cm) UNC-20 screw, top and bottom of camera housing

ENVIRONMENTAL
- Operational Temperature: 14° to 122°F (–10° to 50°C)
- Storage Temperature: 14° to 158°F (–10° to 70°C)
- Storage Humidity: 20% to 90%, noncondensing

NOTE: VALUES IN PARENTHESES ARE CENTIMETERS; ALL OTHERS ARE INCHES.
TECHNICAL SPECIFICATIONS

VIDEO

Video Encoding
H.264 high, main, or base profile and MJPEG

Video Streams
Up to 2 simultaneous streams; the second stream is variable based on the setup of the primary stream

Frame Rate
Up to 30, 25, 24, 15, 10, 8, 7.5, 6, 5, 4, 3, 2.5, 2, 1 (dependent upon coding, resolution, and stream configuration)

Additional Resolutions
640 x 512, 640 x 352, 480 x 368, 480 x 272, 320 x 256, and 320 x 176

Supported Protocols
TCP/IP, UDP/IP (Unicast, Multicast IGMP), UPnP, DNS, DHCP, RTP, RTSP, NTP, IPv4, SNMP, QoS, HTTP, HTTPS, LDAP (client), SSH, SSL, SMTP, FTP, mDNS (Bonjour), and 802.1x (EAP)

Users
Unicast
Up to 20 simultaneous users depending on resolution settings (2 guaranteed streams)

Multicast
Unlimited users H.264

Security Access
Password protected

Software Interface
Web browser view and setup, up to 16 cameras

Pelco System Integration
Endura 2.0 (or later)
Digital Sentry 4.2 (or later)

Open IP Integration
Pelco IP camera API

Minimum System Requirements
Processor
Intel® Core® 2 Duo microprocessor, 2.6 GHz

Operating System
Microsoft® Windows® XP, Windows Vista®, or Mac® OS X 10.4 (or later)

Memory
2 GB RAM

Network Interface Card
100 megabits (or greater)

Monitor
Minimum of 1024 x 768 resolution, 16- or 32-bit pixel color resolution

Web Browser*
Internet Explorer® 7.0 (or later) or Mozilla® Firefox® 3.0 (or later)

Media Player†
QuickTime® 7.6.5 for Windows XP, Windows Vista, or QuickTime 7.6.4 for Mac OS X 10.4

*Internet Explorer is not supported by Mac OS X 10.4.
†This product is not compatible with QuickTime version 7.6.4 for Windows XP or Windows Vista. If you have this version installed on your PC, you will need to upgrade to QuickTime version 7.6.5.

ANALYTICS

Required Systems for Pelco Analytic Suites
Pelco Interface
WSS200 Advanced System Management Software on an Endura 2.0 (or later) system

Open API
Pelco analytics allow streaming information to communicate though Pelco’s API Guide for Video Analytics version 0.35.30 (or later), available at Pelco.com/IP

Required System for Object Video Suites
OV ready-compliant system with OV Ready video management system

ACCESSORIES

IX-SC 4-foot Sarix service cable; compatible with standard BNC connectors
IA-A Audio adapter compatible with a USB 2.0 A to 5-pin mini-B cable; supplied with two USB extension cables: 1 ft (0.3 m) and 3 ft (0.9 m)

RECOMMENDED MOUNTS

C10-UM Universal camera mount

RECOMMENDED ENCLOSURES

EH1512 Indoor/outdoor enclosure
EH3512 Outdoor enclosure
DF8 8-inch fixed mount dome

RECOMMENDED LENSES

13M2.2-6 Megapixel lens, varifocal, 2.2~6.0 mm, f/1.3~2.0
13M2.8-8 Megapixel lens, varifocal, 2.8~8.0 mm, f/1.2~1.9
13M2.8-12 Megapixel lens, varifocal, 2.8~12.0 mm, f/1.4~2.7
13M15-50 Megapixel lens, varifocal, 15.0~50.0 mm, f/1.5~2.1

Pelco megapixel lenses have been designed and tested to deliver optimal image quality for the IXE20 Series camera. The use of standard definition lenses on IXE20 Series megapixel cameras will limit the resolution of the camera, creating poor image quality.
