

Video surveillance as a service

Arcules

Simplify video security the cloud way

The simple way to secure your business

Looking for an easy-to-use video security solution that doesn't take up your time? Arcules is the answer.

Arcules is a cloud-based video surveillance as a service (VSaaS) by Milestone that simplifies video management, letting you centralize your security operations. Accessible from anywhere, secure and scalable across multiple locations, Arcules reduces complexity and maximizes efficiency. Your day is busy enough, so let Arcules cover your security needs while you focus on the rest.

Make security simple and secure

Enhance your security operations with an intuitive platform that's secure, always up to date and with no need for extensive hardware or maintenance.

Quickly scale and easily adapt

Grow and adapt your surveillance with cloud-based scalability, seamless open integrations, and the flexibility to use your existing cameras.

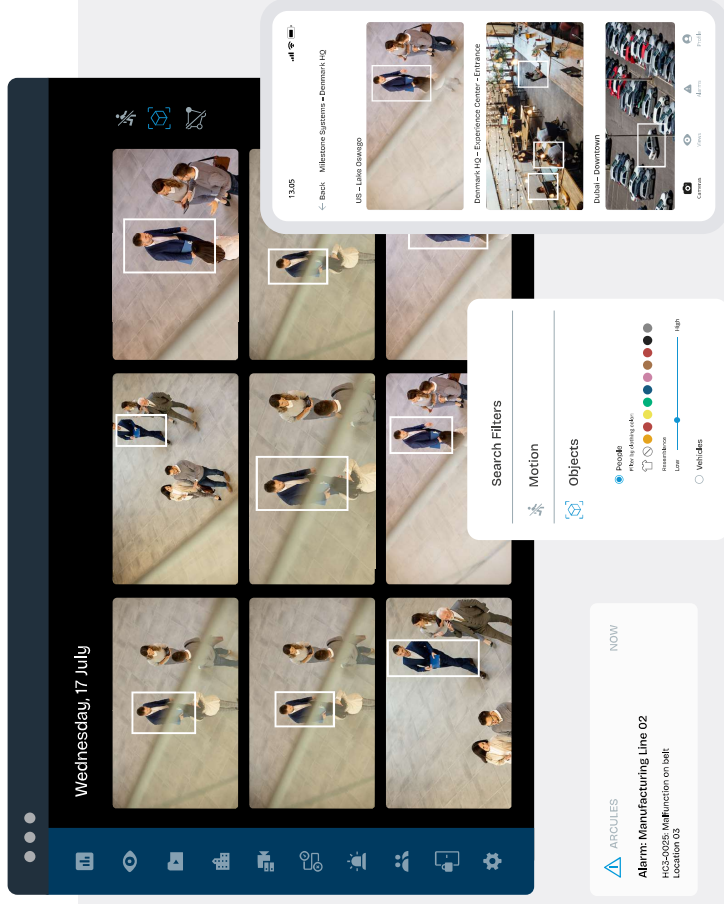

Drive better outcomes with intuitive analytics

Use AI-powered analytics, customizable rules and advanced search tools to transform your video data into actionable insights — helping you make decisions based on data, not guesses.

Maximize protection, minimize effort

Transform your security operations with AI-powered video management, smart analytics and unified IT control — all from a single cloud platform.

Intelligent alerts

Respond faster to potential incidents with AI-powered detection and notifications.

Never miss what matters

Rest easy knowing Arcules helps you keep eyes on your entire business 24/7.

Universal monitoring

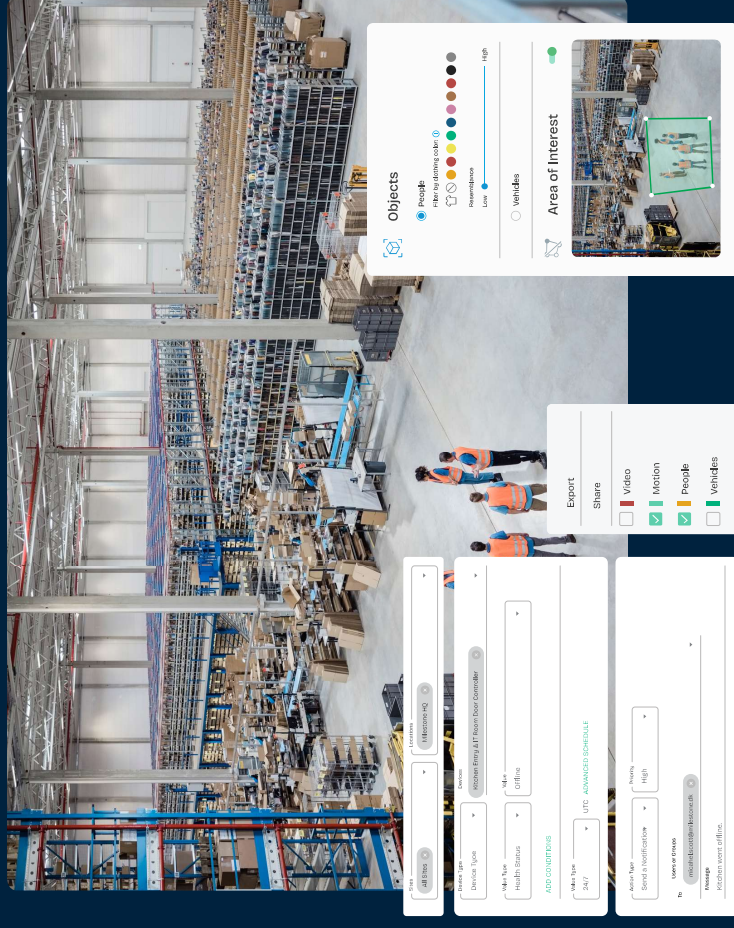

Access live and recorded video, from anywhere, anytime, on any device.

Real-time visibility

Monitor all locations simultaneously, giving you complete situational awareness.

From incident to insight in minutes

Quickly turn security events into resolved cases with powerful alerts, search and investigation tools.

Smart alert configuration

Easily create custom alarms and notifications that match your security protocols.

Seamless evidence management

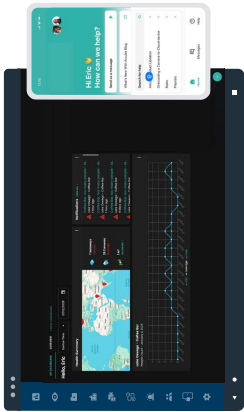

Centralize and secure all digital evidence for stronger, shareable cases.

Fast investigation

Find exactly what you need in minutes, not hours with intelligent video search.

IT control without complexity

Empower your IT team with unified management and intelligent automation that save time and reduce headaches.

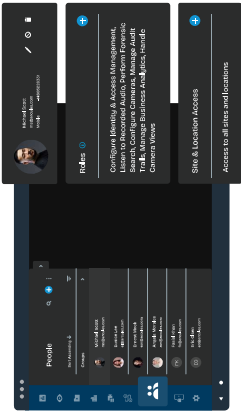

Single dashboard

Streamline operations by managing your entire security infrastructure from one platform.

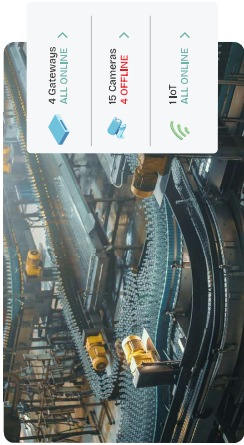

Zero-touch management

Eliminate manual updates and maintenance with automatic cloud-based software deployment.

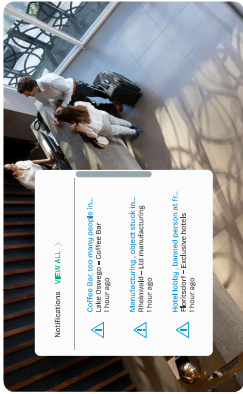

Effortless administration

Save time with simplified user management and intuitive system configuration tools.

Predictive maintenance

Catch issues before they impact your business with real-time health monitoring and alerts.

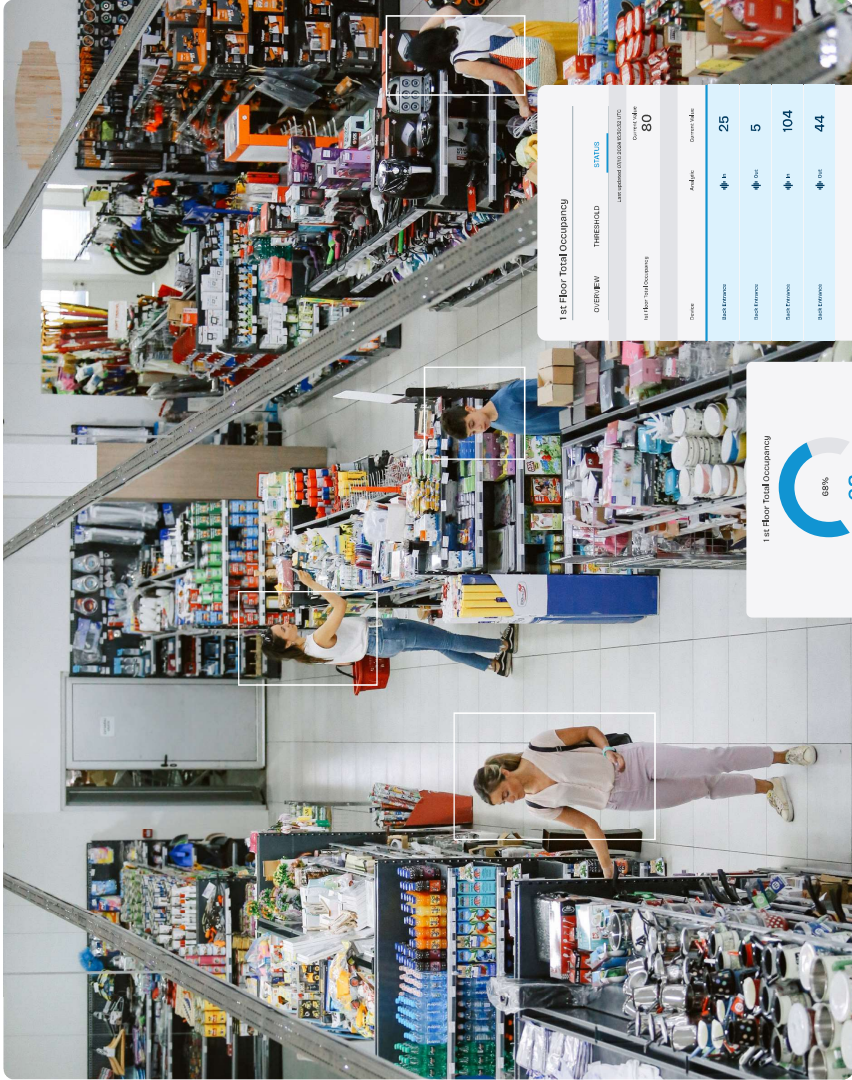

Instant performance insights

Optimize your system with self-service analytics that show critical data points.

Easily export and share footage

Quickly share and save video, or consolidate digital evidence into a shareable incident report.

Analytics that drive decisions

Get reliable AI analytics for object detection, motion tracking and proactive alerts.

Device flexibility

Compatible with a range of cameras with built-in analytics — or make any camera smart with cloud-based analytics.

Streamline investigations

Easily review footage and share key findings in moments.

Reduce false alarms

Cloud-based AI reduces nuisance alarms by adapting and refining itself to your unique environment.

Improve efficiency

Real-time device health status helps optimize operations, reduce costs and predict maintenance trends.

Designed with cybersecurity in mind

Cybersecurity is built right into Arcules. You can count on your installation always being protected with the latest security updates.

Secure by design

Built with product security, cloud security, device security and compliance in mind.

Proven vendor

Over 500,000 sites trust Milestone's 20+ years of experience in designing secure video management.

Secure cloud base

Built on a trusted Google cloud architecture using cybersecurity best practices.

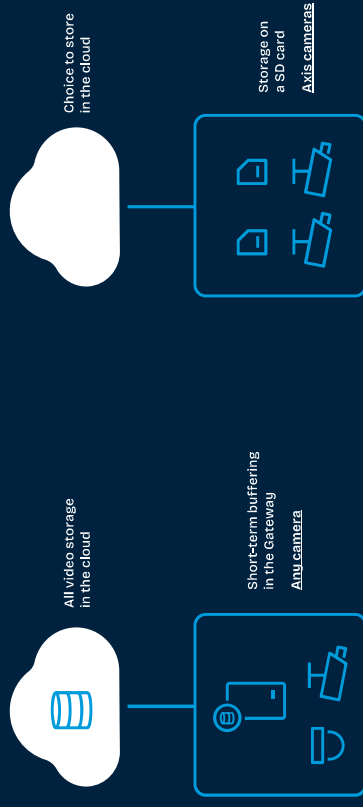

Continuous protection

Up-to-the-minute security updates keep you secure.

Future-proof your security solution by choosing from 20,000+ devices, cameras, sensors and IoT devices from world-class partners.

Adapts to your needs

Arcules is a cloud-based VSaaS (video surveillance as a service) platform. It allows you the flexibility to choose a deployment option that works best with your systems, your video storage preferences and your bandwidth constraints.

Arcules with a Gateway

Ideal for multi-location businesses like real estate, manufacturing, and education, our Gateway solution supports over 20,000 ONVIF cameras and devices.

Capitalize on the open platform that integrates video analytics, cloud access control, IoT devices, and two-way audio.

Flexible storage options — edge or cloud — mean you can customize your security infrastructure to precisely match your operational needs. Simple, economical, and powerful.

Arcules Camera to Cloud

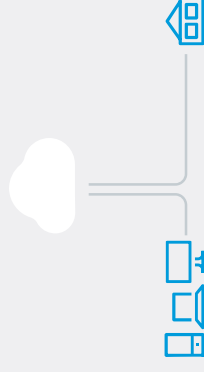

Simplify surveillance for smaller locations and multi-site businesses with our Camera to Cloud deployment option. By integrating AI-powered analytics directly into select Axis cameras, we eliminate on-site hardware and complexity.

This approach dramatically reduces bandwidth costs, simplifies installation, and streamlines maintenance.

Perfect for businesses seeking a lean, intelligent security strategy that adapts to your evolving needs.

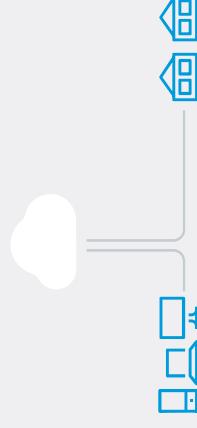

Choose an installation that fits your site

Single site

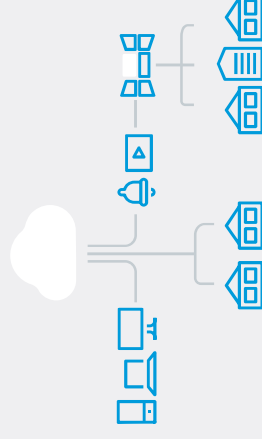

Arcules is an ideal plug and play option for medium to enterprise-sized businesses with less complex security needs. You can manage it yourself, and don't need to worry about updates, cybersecurity and maintenance — these are automatic.

Multi-site

Businesses with two or more sites can keep a clear and centralized overview of their security. It is also easy to expand your security solution to new sites or temporary ones such as construction sites or social venues.

Hybrid

Combine Arcules with on-premises XProtect software for the best of both worlds. It's ideal for expanding your video coverage to dispersed sites with minimal effort, while gaining centralized access to all live video, recordings and alarms.
