XProtect[®] Rapid REVIEW 2021 R2 (6.1)

Available November 30th, 2021

Key Features

REVIEW

- **Case management:** Organize all video assets of an investigation in a single container, bookmark objects of interest, and summarize case findings (including all relevant exhibits) in an exportable report, while dynamically collaborating on cases with other users.
- **VIDEO SYNOPSIS®:** VIDEO SYNOPSIS solution simultaneously presents objects that have appeared at different times within the video. The result is a dramatically shorter video segment that fully preserves the viewer's ability to analyze the scene, enabling the review of hours of video in minutes and sometimes seconds.
- **Multi-camera search:** Powerful and advanced multi-camera search capabilities for all Rapid REVIEW search filters and Visual Layers.
- **Proximity identification:** Search for and identify the distance between individuals over time and location for compliance with physical distancing and contact tracing, as well as criminal investigations.
- **Face mask detection:** Forensically search and filter video to identify face mask usage.
- **Face recognition:** Accurate face recognition for rapidly pinpointing persons included or excluded in watchlists, based on images extracted from existing video or data uploads.
- **License plate recognition:** Differentiated license plate recognition, designed especially for "in the wild" surveillance scenarios and ease of operation in finding license plates through watchlists, existing video or data uploads.
- **Line crossing:** Detect, filter and count objects that cross a demarcation in a pre-defined direction to drive perimeter protection and directional object count.
- **Appearance similarity:** Instantly locate people, vehicles, and other items of interest by searching for objects with similar attributes.
- **Visual layers:** Create visual analytics for activity, dwell time, common paths, and background changes.
- **Filter tolerance:** Adjust tolerance levels to refine search results.
- **Density & speed control:** Increase or decrease the number and speed of events shown at once.
- **Sort control:** View events by relevance or by order of occurrence and easily zoom in on items of interest.
