DECLARATIONS OF CONFORMITY

We. Veracity UK Ltd. of Prestwick International Aerospace Park, 4 Dow Road, Prestwick, KA9 2TU. UK declare under our sole responsibility that the product:

VHW-HWPS-C4 HIGHWIRE Powerstar Quad

is in conformity with the essential requirements and other relevant requirements of the EMC Directive (2014/30/EU)

The products are in conformity with the following standards:

> EN 55022:2010 EN 55024:2010

Responsible person: a Miles

Alastair McLeod, Group CEO

CONNECTIONS & LEDS

LED	FUNCTION		
RJ45 Yellow	On = link Blink = activity		
RJ45 Green	On = POE detected and enabled		

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this

device must accept any interference received, including

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection

against harmful interference when the equipment is operated

This equipment generates, uses, and can radiate radio frequency

energy and, if not installed and used in accordance with the instruction

manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful

interference in which case the user will be required to correct the

interference that may cause undesired operation.

in a commercial environment.

interference at his own expense.

LED	FUNCTION		
RJ45 Yellow	On = link Blink = activity		
RJ45 Green	On = POE detected and enabled		

CONNECTIONS & LEDS

BNC Connector (for connection to any 750hm coaxial cable)

Power Connector Optional (Connect to a Veracity 57V power supply only - in polarity shown)

LED	FUNCTION	GREEN	ORANGE	RED
COAX LINK	Coax data connection	Blink = no link On = 100Mbps	Loss of data	Severe Loss of data
COAX NET	Base side network connection	On = link Blink = activity	n/a	10Base-T (not supported)
COAX PWR (Power)	POE over coax status	On = enabled by Base unit	n/a	Blink = error code
POE POWER BUDGET	Total camera power budget	On = available 5W blink = <5W	Approaching power limit	Power limit exceeded

VH\M-H\MPS-C4

4 PORT ETHERNET OVER COAX ADAPTOR

APPLICATION DIAGRAM POE OVER COAX

Connect 1-4 cameras or POE / non-POE devices to the RJ45 ports.

| 57V DC power to the HIGHWIRE Powerstar Base unit is recommended, giving typically 25 watts of total camera power budget. | Total camera power budget using a POE switch is typically 8 watts (802.3af) or 18 watts (802.3at). Refer to the power budget table in the datasheet.

Note | The LED indicated power is the total limit and remains constant.

APPLICATION DIAGRAM LOCAL POWER SUPPLY

Connecting 57V DC power directly to the Quad unit increases the POE power available if required.

The VPSU-57V-800 supply supports 40 watts of total camera power and the VPSU 57V-1500 supports 78 watts.

| No POE is sent over the coax, so a HIGHWIRE VHW-HW powered by 12V may be used at the base side.
