

1.3 Mpixel IP-camera sensitive to 0.1 lux @ F 1.4
Frame Rate 30 fps @ Resolution 1,280 x 1,024

The AV1300 Series offers the same frame rate as NTSC and real time high definition digital video surveillance with 4 times the resolution of the best analog surveillance cameras.

- **HIGH RESOLUTION & FULL MOTION:** AV1300 Series network camera delivers full motion progressive scan 1280 x 1024 video at 30 fps featuring massively-parallel MegaVideo® image processing architecture capable of sustaining over 6 billion operations per second.

- **COST EFFICIENCY:** High resolution and crystal clear imagery allows the AV1300 Series to substitute up to four analog cameras; thereby reducing the total cost of installation. No need to supply a separate power source since the power can be drawn from a low cost Power-over-Ethernet switch.

- **FORENSIC ZOOMING:** AV1300 Series surveillance system has the ability to zoom in after any event from high resolutions digital archives. You can also simultaneously view zoomed and full field of view images.

- **24-HOUR SURVEILLANCE WITH DAY/NIGHT FEATURE:** The MegaVideo® single sensor Day/Night feature is especially useful where you need to capture images under highly variable lighting conditions, such as brilliant mid-day sun, and dim night. In daytime illumination, the camera operates in normal color mode providing vivid images, then automatically changes to black-and-white mode using IR cut filter removal technology when the light fades at dusk. The transition from day to night is fully programmable, or can be forced to either day or night mode.

- **ONBOARD MOTION DETECTION:** Onboard real-time motion detection with size and sensitivity controls for up to 64 separate motion detection zones.
