Milestone
HUSKY™ M20

The easiest installation
you've ever done

The Husky M20 is the quickest route to an all-in-one surveillance solution

80

The industry's most reliable installation process: With Milestone Smart Start, most of the setup is done for you.
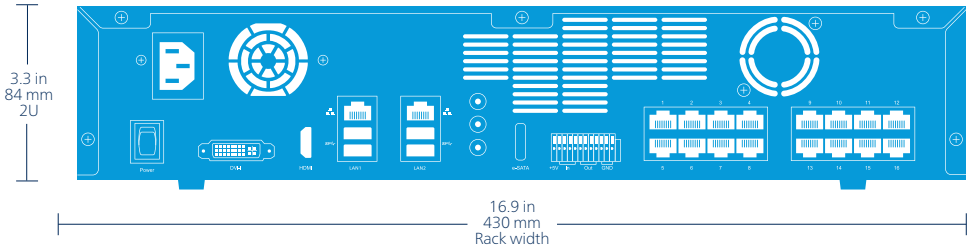

An NVR so simple it installs itself: Smart Start plug-and-play features automatically configure storage allocation, identify network cameras and synchronize devices with the time server.

One hub to manage your entire system: An integrated managed Power over Ethernet (PoE) switch makes system design, installation and power management a breeze.
