

Tower mounts with junction boxes

The VRD-TMJB and VDM-TMJB tower mount dome brackets incorporate a junction box on the upright section of the bracket.

This junction box allows for simple access to the cable termination, this greatly simplifies both installation and maintenance.

These 2 models cover the complete range of Vista external domes, from both the analogue and IP ranges.

The 1.5" NTP thread of the VDM-TMJB is a standard for a number of popular dome manufacturers such as Pelco.

Using an industry standard 4 inch PCD (Pitch Centre Diameter) base plate the VRD-TMJB and VDM-TMJB can be mounted on any CCTV tower or pole.

VRD-TMJB

VDM-TMJB

Features and Benefits:

Junction box

The inclusion of the junction box on the brackets makes cable termination very easy so simplifying installation and maintenance.

4 in PCD base plate

The industry standard base plate allows the domes to be mounted on any standard CCTV tower or pole mount.

TECHNICAL SPECIFICATION:

	VDM-TMJB	VRD-TMJB
Overall height	620mm	
Overall width	420mm	470mm
Internal pole diameter	34mm	
Base plate dimension	4 inch PD (101.4mm)	
Junction box internal dimensions	150mm (H) x 75mm(W) x 75mm (D)	
Colour	RAL7035	
Dome mount	1.5" NPT	4 x M5 threaded holes at 120mm diameter

Dome types	VDM-TMJB	VRD-TMJB
Vista dome ranges	VPP VP-960H VK2-1080PTZHSG	VVRD VPL5 VPL6 VPL7 VK2-VRD VK2-600PTZ VK2-1080XVRDPTZ
Third party domes	Any housing with 1.5" NPT external thread	N/A
