- **Connection Cable**

NO	Name	Description
1	Lens	Allows wide area to be monitored
2	Ethernet Cable	Cable for Ethernet (POE)
3	Power Cable	Cable for Power source (DC 12V)

- **Camera Dimension**

See the diagrams below for the exact dimension

## 2. Installation

### 2.1 Connection

1. Make mounting holes and cable hole in the place (ceiling or wall) to which this dome camera is installed using the Drilling guide label.

2. To remove dome cover, turn the dome body counter clockwise until locations reach end travel and pull off. Push the liner on the sides where the patterns are put in the teeth of a comb and pull it out.

## Quick Installation Guide

3. Attach the housing to the ceiling using suitable fasteners, M6x35 tapping screws supplied only use if they are suitable.

Turn the housing to right direction about 16 degrees to lock in place.

4. the assembly of the dome body and liner is in reverse order of disassembly.

Finally, lock dome body with locking screw(M3x5) from the accessory Kit.

- **Micro SD memory slot**  
Insert the SD memory card.

- **Connecting the Power**  
Connect the DC 12V power adaptor to the camera.

## 2.2 Network Connection and IP assignment

The Network Camera supports the operation through the network. When a camera is first connected to the network it has no IP address. So, it is necessary to allocate an IP address to the device with the “Smart Manager” utility on the CD. The factory default IP is “192.168.30.220”.

1. Connect the Network Camera / device to the network and power up.
2. Start SmartManager utility (Start>All programs>SmartManager>SmartManager), the main window will be displayed, after a short while any network devices connected to the network will be displayed in the list.

3. Select the camera on the list and click right button of the mouse. You can see the pop-up menu below.

4. Select Assign IP. You can see a Assign IP window. Enter the required IP address.

**Note:** For more information, refer to the Smart Manger User’s Manual.

### 3. Operation

The Network Camera can be used with Windows operating system and browsers. The recommended browsers are Internet Explorer, Safari, Firefox, Opera and Google Chrome with Windows.

#### 3.1 Access from a browser

1. Start a browser (Internet Explorer).
2. Enter the IP address or host name of the Network Camera in the Location/Address field of your browser.
3. You can see a starting page. Click Live View or Setup to enter web page.

4. The network camera's **Live View** page appears in your browser.

#### 3.2. Access from the internet

Access from the internet once connected, the Network Camera is accessible on your local network (LAN). To access the network camera from the Internet you must configure your broadband router to allow incoming data traffic to the network camera. To do this, enable the NAT-traversal feature, which will attempt to automatically configure the router to allow access to the network camera. This is enabled from Setup > System > Network > NAT.

For more information, please see "3.5.5 System>Network>NAT" of User's Manual.

## 3.3 Setting the admin password over a secure connection

To gain access to the product, the password for the default administrator user must be set. This is done in the “Admin Password” dialog, which is displayed when the network camera is accessed for the setup at the first time. Enter your admin name and password, set by the administrator.

Note: The default administrator username and password is “admin”. If the password is lost, the Network Camera must be reset to the factory default settings. See “3.6 Resetting to the Factory Default Settings”.

## 3.4 Live View Page

The live view page comes in several screen modes: 1920x1080, 1280x1024, 1280x720, 704x480(576), 640x480, 352x240(288) and 320x240. Users are allowed to select the most suitable one out of those modes. Please, adjust the mode in accordance with your PC specifications and monitoring purposes.

### 1) General controls

 Live View Page  Search & Playback Page  Setup Page  Help Page

 VIDEO The video drop-down list allows you to select a customized or pre-programmed video stream on the live view page. Stream profiles are configured under Setup > Basic Configuration > Video & Image. For more information, please see “3.5.1 Basic Configuration > Video & Image” of User’s Manual.

 4CIF (704x480) The resolution drop-down list allows you to select the most suitable one out of video resolutions to be displayed on live view page.

 HTTP The protocol drop-down list allows you to select which combination of protocols and methods to use depends on your viewing requirements, and on the properties of your network.

## 2) Control toolbar

The live viewer toolbar is available in the web browser page only. It displays the following buttons:

-  The Stop button stops the video stream being played. Pressing the key again toggles the start and stop. The Start button connects to the network camera or start playing a video stream.
-  The Pause button pause the video stream being played.
-  The Snapshot button takes a snapshot of the current image. The location where the image is saved can be specified.
-  The digital zoom activates a zoom-in or zoom-out function for video image on the live screen.
-  The Full Screen button causes the video image to fill the entire screen area. No other windows will be visible. Press the 'Esc' button on the computer keyboard to cancel full screen view.
-  The Manual Trigger button activates a pop-up window to manually start or stop the event.

## 3) Video Streams

The network camera provides several images and video stream formats. Your requirements and the properties of your network will determine the type you use.

The Live View page in the network camera provides access to H.264, MPEG-4 and Motion JPEG video streams, and to the list of available video streams. Other applications and clients can also access these video streams/images directly, without going via the Live View page.

## 3.5 Network Camera Setup

This section describes how to configure the network camera, and is intended for product Administrators, who have unrestricted access to all the Setup tools; and Operators, who have access to the settings for Basic, Live View, Video & Image, Event, and System Configuration.

You can configure the network camera by clicking Setup in the top right-hand corner of the Live View page. Click on this page to access the online help that explains the setup tools

When accessing the Network Camera for the first time, the “Admin Password” dialog appears. Enter your admin name and password, set by the administrator.

Note: If the password is lost, the Network Camera must be reset to the factory default settings. See “3.6 Resetting to the Factory Default Settings”.

### 3.6 Resetting to the factory default settings

To reset the Network Camera to the original factory settings, go to the Setup>System> Maintenance web page (described in User's Manual, "3.5.5 System > Maintenance") or use the Reset button on the network camera, as described below

- **Using the Reset Button**

Follow the instructions below to reset the Network Camera to the factory default settings using the Reset button.

1. Switch off the Network Camera by disconnecting the power adapter.
2. Press and hold the Reset button with a straightened paperclip while reconnecting the power.
3. Keep the Reset button pressed during about 2 seconds or more than.
4. Release the Reset button.
5. The network camera resets to factory defaults and restarts after completing the factory reset.

**Caution:** When performing a Factory Reset, you will lose any settings you have saved.  
(Default IP 192.168.30.220)

### 3.7 More Information

For more information, please see the Network Camera User's Manual, which is available on the CD included in this package.
