

EXTERNAL WALL MOUNT FOR DOME CAMERAS

The VPL-EWMBE is a wall mount bracket designed specifically to be used with both analogue and IP cameras which have a 1.5" NPT connector and is suitable for both external and internal applications.

The 1.5" NPT thread, makes camera connection very simple and provides excellent protection against moisture ingress. With a large internal pipe diameter, it allows connections, including the RJ45 connector to be made and stored inside. This fitting also accommodates the cable gland at the top of the camera, so additional adaptors are not required. The slight slope on the up stand reduces the chance of any standing water, should it make its way into the bracket from the back plate.

Whilst designed for use with the VPL7-WP-PM and VK2-1080PTZ cameras, the 1.5" NPT thread also allows the VPL-EWMBE bracket to be used with other cameras that utilise this fitting, such as the Vista Powerdome Pro (VPP) range and can also be used in conjunction with the VDM-ECMA for corner mount applications.

Key Features:

Large diameter pipe

Allows connectors and any terminations to be pulled through and made inside if required

Simple camera connection

The 1.5" NPT screw thread makes for quick & simple installation on site

Powder coated

This allows the bracket to be suitable for both external and internal applications

FLEXIBILITY BY DESIGN

MODELS IN THIS RANGE:

0498960 VPL-EWMBE Wall bracket for VPL7-WP-PM & VK2-1080PTZHSG

ASSOCIATED PRODUCTS:
