## Speed Dome Network Camera

# SD7151

## Day/Night Outdoor 18x Zoom Progressive Scan CCD

VIVOTEK SD7151, equipped with an 18x optical zoom lens, is a high performance day/night speed dome network camera suitable for professional surveillance applications. It is another significant addition to VIVOTEK's high-end network camera portfolio of progressive-series.

Adopting Sony 18x optical zoom lens plus progressive CCD sensor, this network camera allows you not only to have close-up images with exceptional detail from a long distance when enlarged but also get crystal-clear, razor-sharp images of fast-moving objects without jagged edges. With sophisticated pan/tilt mechanism, it provides fast, precise movement with continuous 360-degree pan and 90-degree tilt. You can easily control the lens position by a mouse or a joystick to track the object you are interested in and have up to 128 presets for patrolling.

The day and night function makes this camera ideal for operating under diverse lighting conditions. When light conditions turns poor, the IR cut filter will be automatically removed to accept IR illumination. Meanwhile, the camera switches itself automatically from color to black and white, assuring optimal image quality at all times.

More advanced features including 3GPP mobile surveillance, two-way audio by SIP protocol, and digital I/O for external sensor and alarm make VIVOTEK SD7151 a full-featured speed dome. It is the best solution for various enterprise projects such as airports, highways, parking lots, and shopping malls, where high-level reliability and precision is always required.

## Product Features

### SD7151

- SONY Progressive Scan CCD Sensor in VGA Resolution
- 18x Zoom Lens
- Removable IR-cut Filter for Day & Night Function
- 360° Continuous Pan and 0°~90° Flip Tilt
- Vandal-proof and Weather-proof
- Real-time MPEG-4 and MJPEG Compression (Dual Codec)
- Supports Dual Streams Simultaneously
- 3GPP Mobile Surveillance
- Easy, Fast, Accurate PTZ Control by Joystick
- Two-way Audio by SIP Protocol
- Digital I/O for External Sensor and Alarm

## Versatile Applications

Airports

Freeway

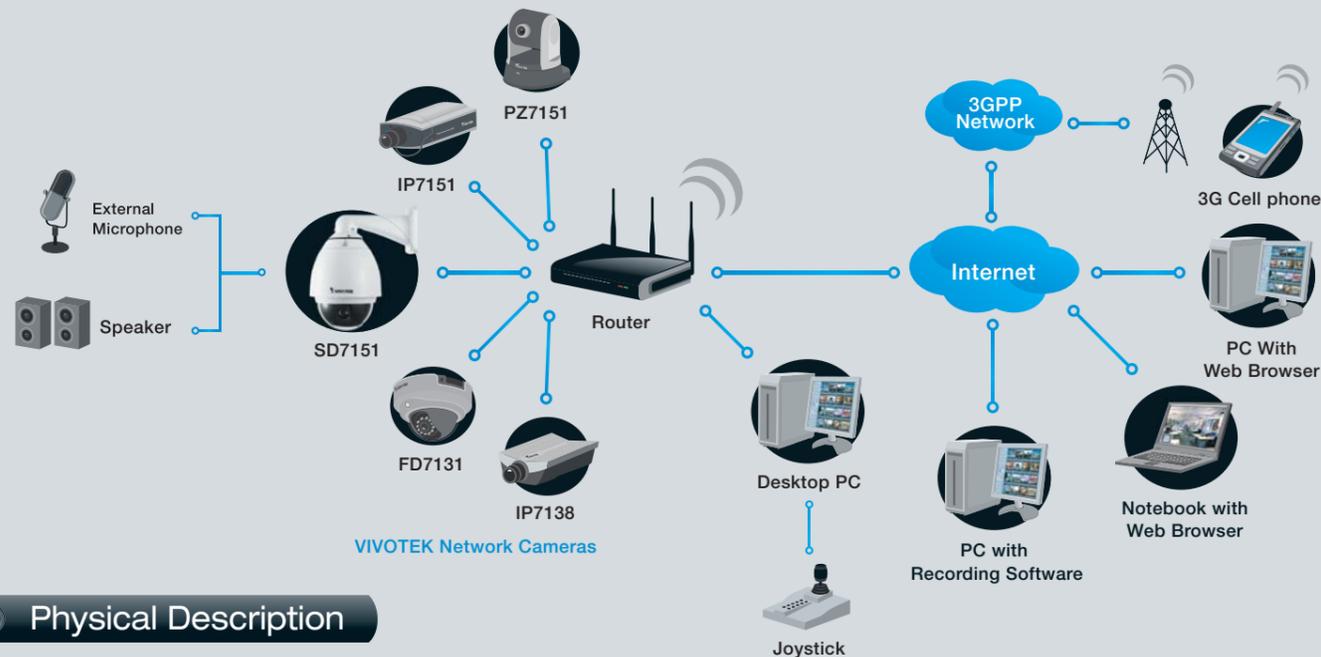

Parking lots

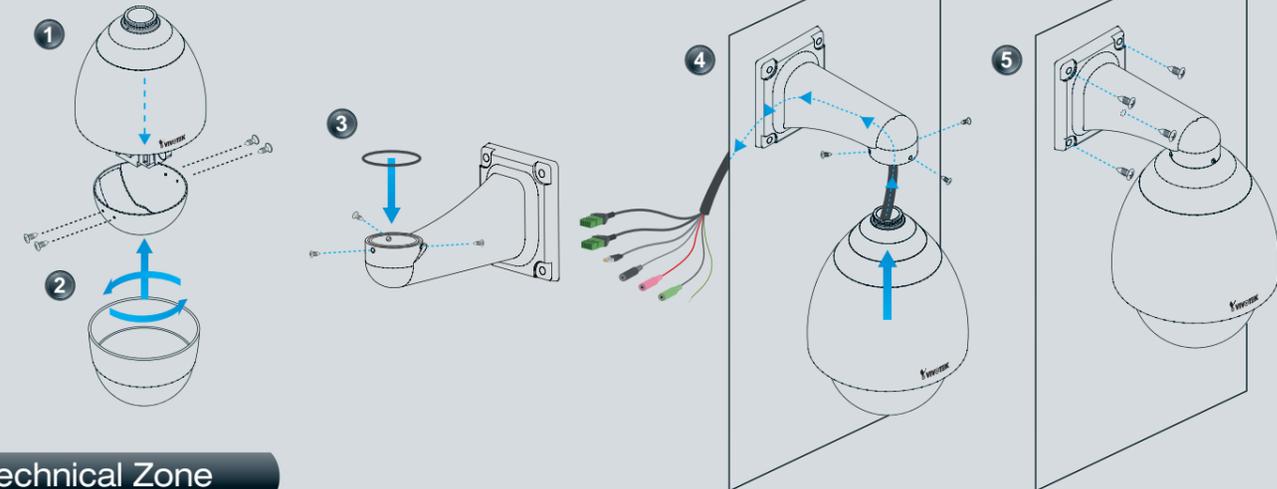

Shopping malls

## System Overview

## Easy Installation

## Technical Zone

### Progressive Scan CCD Sensor

Optimum solution for shooting high-speed moving objects

The progressive scan CCD sensor effectively offers an excellent solution for shooting high-speed moving objects. It can clearly capture images of moving objects that traditional interlaced-scan techniques could not achieve. Unlike interlaced-scan techniques, progressive scanning scans all the lines simultaneously so as to present razor-sharp, clear, and high-resolution snapshots.

### 18x Optical Zoom Lens

Providing unprecedented image quality

Utilizing Sony 18x optical zoom lens, VIVOTEK SD7151 allows you to have close-up images with exceptional detail and effectively extends your eyesight. You can easily and quickly zoom in on distant objects or any tiny target with unprecedented high quality even when enlarged.

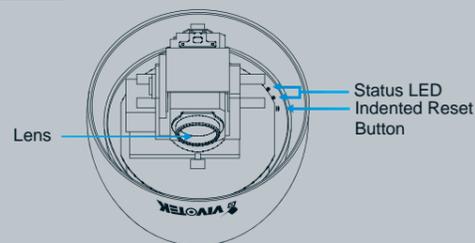

### Day & Night Function

The best solution for 24-hour surveillance

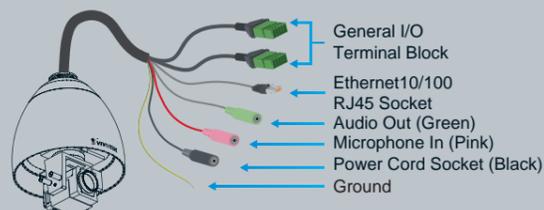

VIVOTEK SD7151 is equipped with a removable IR cut filter, which will automatically be removed at night time to bring the IR light into the sensor to maximize the low light sensitivity. The camera will switch automatically from color to black and white, assuring optimal image quality at all times.

## Physical Description

### Inner View

### Connectors

Pan range: 360° Continuous Rotation  
Tilt range: 0°~90° Flip
